## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 and 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rendered indefinite because m and n are not defined.

Claim 6 is rendered indefinite because it is unclear if claim 6 is dependent upon claim 1 or another claim.

Claim 11 is rendered indefinite because m and n are not defined.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 4-5 are rejected under 35 U.S.C. 102(a) as being anticipated by Beaupre et al., *Optical and Electricla Properties of  $\pi$ -Conjugated Polymers Based on Electron-Rich 3,6-Dimethoxy-9, 9-dihexylfluorene Unit*.

Art Unit: 1774

The reference discloses a comonomer with the structure

Ar =

The reference reads on instant claims 4 and 5 when  $R_1$  and  $R_2$  represent the alkyl group  $C_6H_{13}$ .

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beaupre et al., *Optical and Electric Properties of  $\pi$ -Conjugated Polymers Based on Electron-Rich 3,6-Dimethoxy-9,9-dihexylfluorene Unit*.

The reference discloses polymeric light-emitting diodes comprising polymers with the formula

Art Unit: 1774

The reference discloses the copolymerization of a fluorene comonomer such as

and comonomer,

in the presence of nickel. The reference

does not specifically disclose the light emitting copolymer,

of the present invention. However, the

reference does provide a polymer represented by

Art Unit: 1774

A prima facie case of obviousness may be made when chemical compounds have very close structural similarities and similar utilities. An obviousness rejection based on similarity in chemical structure and function entails the motivation of one skill in the art to make a claimed compound, in the expectation that compound similar in structure will have similar properties *in re Payne*, 606 F.2d 303, 313, 203 USPQ 245, 254 (CCPA1979).
